

Naturally effective.

Oximo WireFree RTS

The eco-designed motorised system
for roller shutters powered by daylight

Solar energy

Yes, the Europeans are aware of the options for using renewable energies in the home. There are some major obstacles preventing them adopting solar power for roller shutter motorisation.

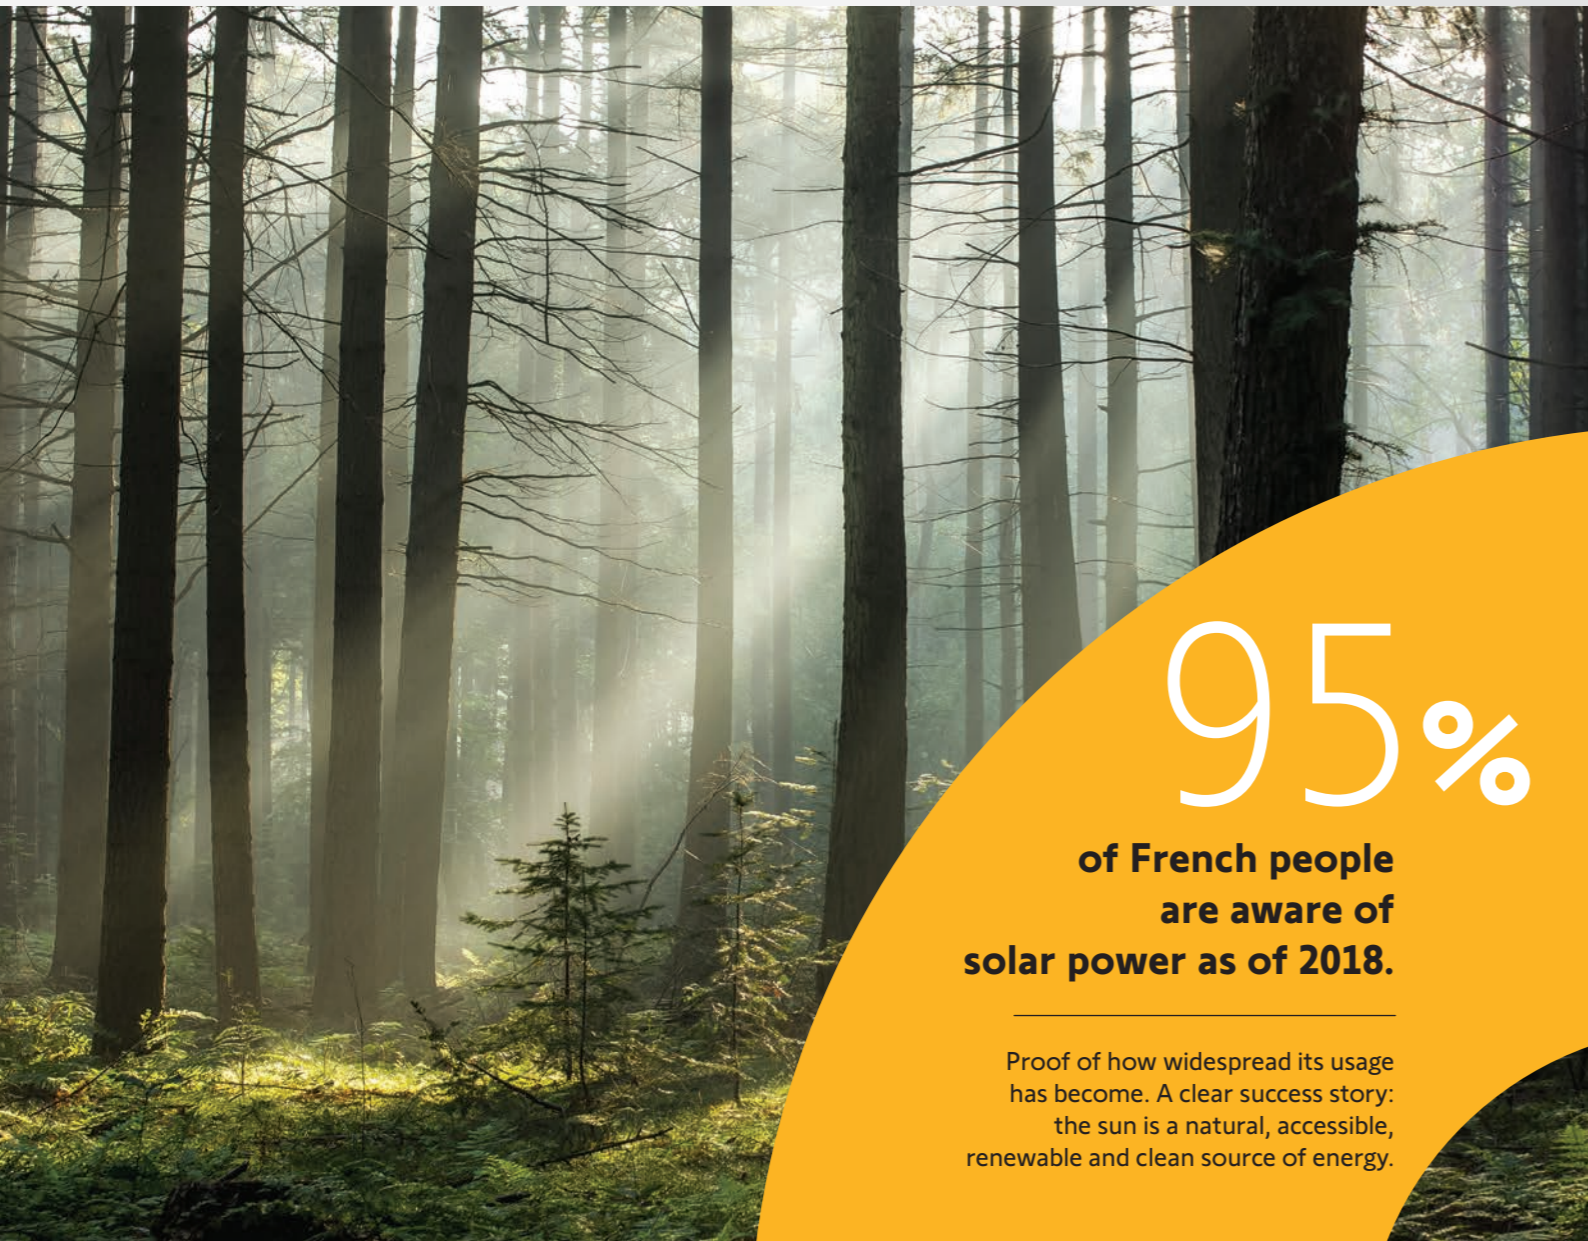

The main obstacles

Lack of reliability
The level of sunlight is too low in my area for solar power.

Too complex
I prefer electric, because solar is complex

Low battery life
What if I want to open my shutters at night?

Not eco-friendly
Solar isn't all that eco-friendly...

95%

of French people are aware of solar power as of 2018.

Proof of how widespread its usage has become. A clear success story: the sun is a natural, accessible, renewable and clean source of energy.

Oximo WireFree RTS

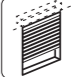

The eco-designed motorised system for roller shutters powered by daylight. Ultra-efficient, no matter the level of sunlight. Just install it, and you're good to go!

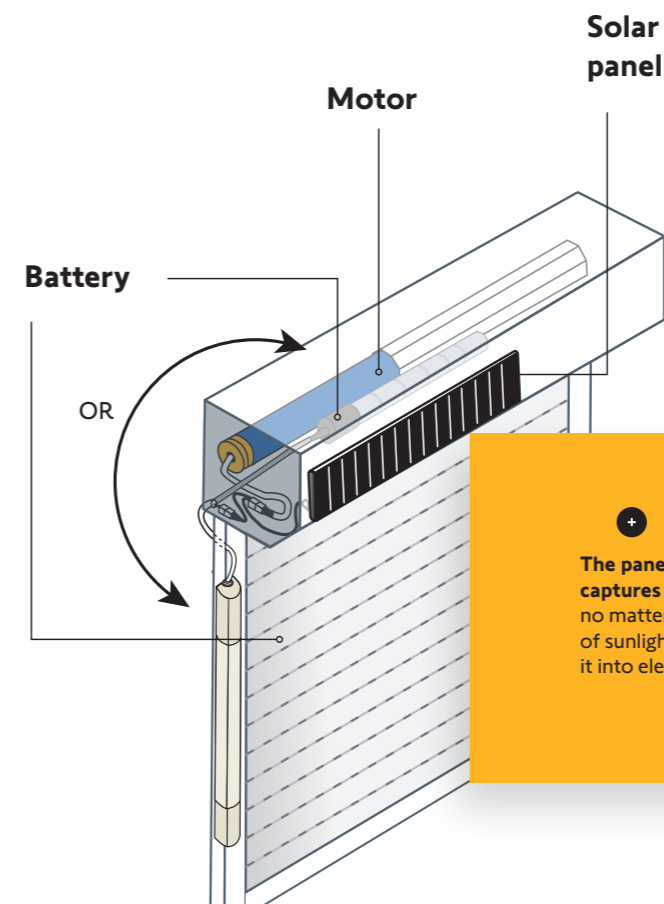

Just install it, and that's it!

A technology as reliable as the morning sunrise.

Suitable for all roller shutters, no matter their fittings, they are easy to install and designed to make life easier for the professional.

-  Traditional rolling shutter
-  Combined window shutter
-  Renovation rolling shutter
-  Roof-mounted rolling shutters

How does the Oximo WireFree RTS work?

- +** The panel captures daylight, no matter the level of sunlight transforming it into electrical energy.
- +** This energy is stored in the battery, which can hold enough power to function for 45 days without any light.
- +** So the battery provides the energy necessary for the motor to function as efficiently as possible.

Oximo WireFree RTS Guaranteed performance

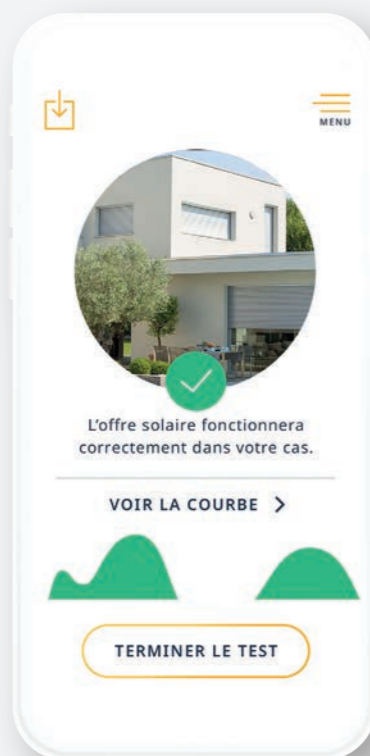

Sure to succeed

The Solar app guarantees that installation be 100% successful.

The Solar app let's you see how Somfy solar solutions will perform in a specific environment before installation.

- + A customised diagnostic, based on 4 criteria:
 - Weather data from the past 30 years
 - Obstacles blocking the sun
 - Window orientation
 - Geolocation

Is my window a suitable place to install my Oximo solar RTS motor? Somfy Solar App gives you an answer in 3 clicks!

1. Enter the dimensions (H-W)

2. Take a photo of the outdoor

3. Check the result of the diagnostic

Guaranteed reliability

Just as reliable as an electric roller shutter, doesn't need full sunlight to operate.

Natural light alone is enough to charge the battery.

Optimal battery life:

45 days minimum

The battery life lasts for 45 days, in complete darkness, based on 2 raise/lower cycles per day.

Guaranteed quality...

The entire ecosystem: panel, motor and battery is guaranteed for 7 years.

Quality assurance ensuring genuine peace of mind. Fewer faults and less after-sales support, means more time for new installations.

...and long life

Battery
+8 years

Solar panel
+20 years*

*The test is performed by an external laboratory, based on 2 raise/lower cycles per day.

4 commitment criteria

- + **Power consumption**
No electrical power supply necessary. 0 kWh consumed from the power grid.
- + **Raw materials**
Materials selected in accordance with the European REACH and RoHS regulations. Solution tested directly by an external certified laboratory.
- + **Packaging**
Cardboard, wedges and manuals made of sustainable, recyclable materials.
- + **Durable**

Operating life
Battery: +8 years
Panel: +20 years
Motor: 14,000 raise/lower cycles, tested

Repairability
Battery can be completely dismantled and replaced, no need to buy a new motor.

Recycling
At the end of the product's life, certified eco-organisations collect and process our products to ensure optimal recycling: COREPILE has a recycling rate of over 78% for batteries, PVCycle recycles more than 94 % of solar panels.

Guaranteed to save time

A solar roller shutter can be installed 3 to 4 times faster than standard, electric motorised roller shutters.

An easy-to-plan installation

Schedule the installation that suits you, because fitting can be done from outside, even when the homeowners are absent.

+ Hassle-free installation.

Oximo WireFree RTS is easy to install because it doesn't need to be hooked up to a control point or an electrical supply. Ideal for renovation projects.

A responsible and sustainable ecosystem

The Oximo WireFree RTS motorised system is eco-designed to comply with the requirements of the **ACT FOR GREEN** label.

ACT FOR GREEN® is Somfy's voluntary procedure which aims to reduce the environmental impact of its products throughout their operating life cycle, from extraction of raw materials up to end-of-life. **ACT FOR GREEN**® guarantees that you have a quality product which respects eco-design requirements.

7-year warranty for the entire Oximo WireFree RTS ecosystem

Oximo WireFree RTS motor

Motor Ø40 12V DC
RTS radio protocol
Torque values: 3, 6 and 10 Nm
Weight of shutter: up to 20 kg

+ The pros:

- **Obstacle detection:** stops if it meets an obstacle on the way down.
- **Deters burglars:** when lowered, the shutter withstands attempts to raise it.
- **Protection against frost:** stops if ice is detected as it raises.
- **Soft stop & start:** gentle stop and start to protect the rolling shutter.
- **Somfy Drive Control™:** ensures the motor torque is constantly monitored, limiting stress and lengthening the ecosystem's operating life.
- **Standby mode:** deactivation possible via remote control to limit battery discharge.

Battery

2 solutions for each type of installation

Technology: NiMH
Capacity: 2200 mAh
Operating temperature: -20° to +70°C
Already charged when delivered

of battery life minimum

+ The pros:

- **Installation inside the box**
Battery without a cover: optimal overall size.
 - **Installation outside**
Battery with aluminium cover: It unclips and comes off easily, leaving the supports on the wall. You have a choice for the installation: attached with screws or with double-sided adhesive tape.
 - **If the battery charge is very low,** the shutter stops as it is on the way up. It will no longer be able to be lowered. The shutter briefly moves up and down.
- Back-up solution** available thanks to the Somfy external battery charger.

Solar panel

Small: L 470 x H 60 x W 6mm
Lightweight: only 230 g
Technology: Monocrystalline

The pros:

- **A single panel** regardless of the motor torque and the direction the window faces.
- **Universal installation:** on all types of boxes or walls.
- **Can be offset** if there are obstacles blocking the light, with 1m and 5m extensions.
- **Fits discreetly** onto the shutter casing.

Choice of control

Compatible with TaHoma

The TaHoma box allows you to control all motorised rolling shutters at once and to schedule shutters to open and close automatically as well to synchronise shutters with many other appliances (lights for example).

Wall-mounted wireless control

Smooove RTS

Wall-mounted control to operate the rolling shutter:
Open, close, stop and "My" favourite position.

Central remote control

Situo RTS

The 5-channel central remote control allows you to control up to 5 roller shutters, separately or together, using 4 functions:
Open, close, stop and "My" favourite position.
Compatible with all RTS remote controls.

Solar-powered rolling shutters are now joining the world of the smart home, and can be controlled either from a smartphone or by voice control!

About Somfy

For the past 50 years, Somfy has been making daily life easier for millions of people around the world, with its smart solutions for home and building management. We innovate to automate and connect shutters, blinds and curtains, gates, garage doors, locks, heating, lighting, cameras and alarms, with the resident at the heart of our concerns. Each day, we work to create reliable, long-lasting solutions, improving day-to-day life and wellbeing for everyone.
