

TaHoma® switch Smart Home Hub

Smart up their home
**to boost
your business.**

somfy®

Install TaHoma today to boost your business.

The booming smart home market is being driven by rising demand for connected solutions offering **comfort, energy savings and safety** – now essential needs for your customers, not optional.

With TaHoma switch Smart Home Hub, you transform every installation into a long-term, value-driven solution that builds trust, and helps grow your business.

1

Build loyalty

by turning every TaHoma Smart Home Hub installation into long-term, recurring business.

Add an average of 5.4 products in the 3 years following installation.

Internal Somfy's data, European figure - In Europe, more than 1 in 2 customers equipped with a TaHoma switch upgrade their system within 3 years of installation; they add an average of 5.4 products including 3 motors.

2

Stand out with proven solutions

TaHoma – built on 15 years of expertise and with **over 1 million users** – is designed to meet the needs your customers truly value.

3

Be more efficient

with **TaHoma pro and Serv-e-Go**, your dedicated digital tools that save you time during installations and remote maintenance.

Register your customers' TaHoma switch to your Somfy pro account and be their go-to contact in the TaHoma app. Manage installations effortlessly. Work smarter with Serv-e-Go alerts for proactive support.

TaHoma switch, Smart Home Hub for connecting home devices

The TaHoma Smart Home Hub is designed to easily connect, centralise and automate home equipment.

With this hub, your customers can control them at the touch of a button, from an app or using a voice assistant. TaHoma is a scalable and secure Smart Home Hub for Somfy equipment (roller shutters, interior blinds, gates, lighting, etc.) and is also compatible with major partner brands (Velux, Atlantic, Sonos, etc.).

TaHoma switch

TaHoma app

Transform every installation into a value-driven solution

"I want to manage all my equipment even when I'm away."

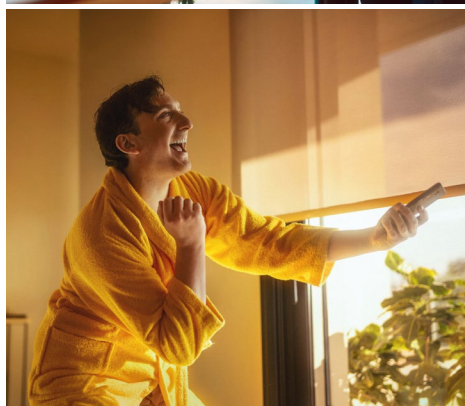

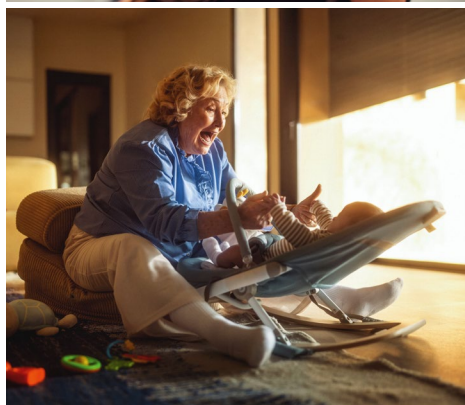

"I want to manage all my equipment at once."

"I want my house to remain comfortable during heat waves."

"I want to reduce my energy consumption."

"I want to keep the outside world out and preserve my privacy."

"I want to simulate my presence when I'm on vacation."

Convenience

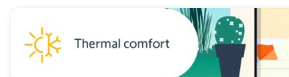

Check the status of devices¹ in real time from the TaHoma app.

Two customisable buttons on TaHoma switch to launch two favourite scenes (ex: preset scenes 'I'm arriving' and 'I'm leaving').

Comfort

Easily automate sun protection with the 'Thermal Comfort' preset scene, which adjusts shutters and blinds to block direct sunlight, even when occupants are away. In summer, this can reduce the indoor temperature by 4 to 7°C².

Energy savings

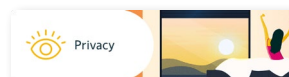

In winter, automated blinds or shutters help reduce heating consumption by 30%³. TaHoma keeps sun protections open to warm home, and closes it at sunset to retain heat.

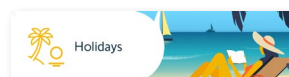

Safety and privacy

Create personalised scenes.

Ex: Create a scheduled scene that activates lights and shutters at a specific time to preserve your privacy.

Simulate presence when you travel by programming shutters to operate at fixed times or at random. Use the preset scene "Holiday"

¹ Concerns io-homecontrol equipment — ² TBC Agency study for the French Building Federation. Analysis of the energy contribution of roller shutters, normative & regulatory study. Maximum temperature compared to a house not equipped with sun protection. Results vary depending on the size of the house, its geographical location, year of construction and window fittings. — ³ Somfy solutions can reduce heating consumption by up to 30% in winter and air conditioning consumption by up to 70% in summer (Somfy simulations implemented with the support of Carbone 4 in 2021).
